Introduction to IppocrateOrg

IppocrateOrg International Association, based in Switzerland, gathers an international network of physicians, researchers, health & social workers and ordinary people.

It was founded by Mauro Rango, graduated in Human Rights in Padova (Italy), with twenty years of experience in right to health and access to care.

IppocrateOrg was born as a movement that assisted covid patients left on their own during the global pandemic and concentrated most of its energies in Italy.

Philosophy

- ❖ Place at the center of our medicine and of our work, every single human being, each with their own needs.
- ❖ Seek personalized answers to health issues.
- ❖ Promote well-being, which is not just the absence of disease, but the pursuit of human happiness.

Milestones

4 May 2020
Mauro Rango
launch his first
message claiming
that the cures for
Covid 19 exist.

18 June 2021
The IppocrateOrg
Association was
born.

04

13 Sept.2021
IppocrateOrg
shares its
experience at the
Senate in Rome.

16 June 2020
The Ippocrate
Movement was
born.

Our group

- Total doctors worldwide: 250
- Italian doctors: 170
- Volunteers for the Communication, for the legal support, for the human resources management and for the relationships with the associates, for the support team of the physicians : 80

IppocrateOrg Today

21 coordinators around the world

IppocrateOrg Assistance

Patients

Patients have the possibility to access to our home therapy service.

Website

Through our website Ippocrateorg.org they can fill in the form with their personal data.

Secretariat

The secretariat evaluates and filters the received data, giving priorities.

Doctors

The cases are shared with the doctors that will be able to call directly the patient by video-call and prescribe the treatment.

Our Protocol

These guidelines are currently followed by physicians working at our Call Centre in Italy and more recently in the U.K. Our therapeutical approach is a customized treatment, based on the available scientific evidence, on the biological plausibility and on each patient situation. All the indications are for practitioners only.

Our Protocol: Stages

Stages	Pathophysiology	Clinic
Stage 1 Early infection	Virus replication	Flu-like symptoms (fever, joint and muscle pain, headache, weakness)
Stage 2 Pulmonary phase	Lung complication	Cough, dyspnoea, polyponea
		Stage 2A (without hypoxia) Stage 2B (with Hypoxia)
Stage 3 Hyper inflammatory phase	Cytokine storm of hypercytokinemia	Sars, vasculitis, microembolism, microthrombosis, multi-organ failure

Our Protocol: Stage 0 (Asymptomatic with positive test)

Drug	Dosage	Contraindications
Vitamin D3	<p>50.000 U.I/day for days (unless in prophylaxis)</p> <p>10.000 U.I/day for 6 days (unless in prophylaxis)</p> <p>Continue with 4.000 U.I/day while eating a greasy meal (for example at lunch)</p> <p>Children: 200 U.I/Kg/day (until negative test)</p>	Severe Chronic Kidney Insufficiency (CKD) Hypercalcemia
Vitamin C	Starting from 1 g/day, in consideration of formulation	Severe CKD, deficit G6PD
Zinc picolinate	30-50 mg/day	
Bromexine	8 mg x 3/day	
Pelargonium S.	<p>>12 y-0: 20 mg x 3/day for 7 days</p> <p>6-12 y-o: 13 mg x 3/day for 7 days</p>	Hemorrhagic diathesis F.E. in patient in treatment with blood thinners
Suffumigation	3 times/day	
Hydrossitirosol and a-cyclodestrine	2-3 puffs x 3-4/day in the throat	

Our Protocol: Stage 1 (flu-like symptoms)

Drug	Dosage	Contraindication
ASA	Up to 100 mg/day till asympomatic	
Ivermectine	0,2 mg/kg of body weight, maximum PC 18 mg 2nd dose after 48 hours 3rd dose (eventually) 48 hours after	
Hydroxychloroquine (HCQ)	200 mg x 2/days for 7 days	Arrhythmias, Retinopathy, Def. G6PDH
Azythromycin or Doxycycline	500 mg/day for 3 days, stop 2 days, then repeat	LQTS
	100 mg x 2/day for 7 days	
Colchicine	0,5 mg x 2 day/day for 14 days	Cardiac insufficiency, CKD do not use with Clarithromicin

Our Protocol: Stage 2A (Lung complication without hypoxia)

Drug	Dosage	Contraindication
Enoxaparine	100 U.I./kg/12 hours	
Corticosteroidi	NEVER AT THE BEGINNING, but only at the end of the viral stage! For 6-7 days then diminish better one morning dose 2 doses if patient is suffering (always Deflazacort, for its fast action)	Hypertension and Hyperglycaemia
Or Desametasone	6 mg/morning or 3 mg x 2/day	Do not associate but use alternatively. Associate Gastropot.
Or Bethametasone	8 mg/morning or 4 mg x 2/day	
Or Metihlprednisolone	32 mg/morning or 16 mg x 2/day	
Or Prednisone	40 mg/morning or 20 mg x 2/day	
Or Deflazacort	30 mg x 2/day	
Antibiotics	According to practitioner's judgment	
Montelukast	10 mg 2 hours after dinner for 14 days	
Amoxi/Clavulanic acid or other antibiotics	876 mg+ 125 mg x 3/day for 8-10 days In association with Azithromycin in case of superinfection	
Acetylcysteine	600 mg up to x 3/day for 7 days	
Levodropropizine	60 mg as needed, up to x 3/day	
Enoxaparin	4.000 U.I. x 1-2/day for 10 days if weight <70 kg 6.000 U.I. x 1-2/day for 10 days if weight 70-100 Kg	Haemorrhagic diathesis and thrombocytopenia
Adenosine	30 mg in 5 ml of saline in nebuliser x 2/day for 6 days	Brochial asthma

Our Protocol: Stage 2B (Lung complication with hypoxia)

Drug	Dosage	Contraindication
O2-therapy	1-6 L/min if SpO2 <92% in AA	
Enoxaparine Corticosteroid Antibiotics	At the discretion of the physician.	

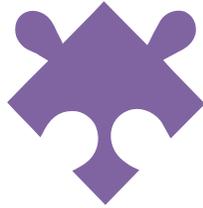

In case Oxygen > 6 L/min
or
SpO2 persistently < 92%

HOSPITALIZATION IS MANDATORY

The correct habits

Use of foods and herbal medicines with antiviral action

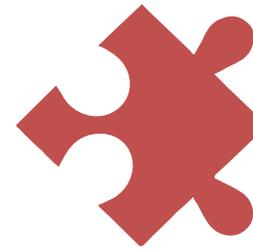

The integration of vit. D - much better if through exposure to sunlight (when not in excess - extremely rare cases).

In the list of supplements recommended in our guidelines, for asymptomatic positive patients, you can find what you need to increase your immune defenses that are not only needed for Covid, but for every pathology. However, I would like to emphasize that even supplements should only be taken after having consulted a doctor who is an expert on the subject.

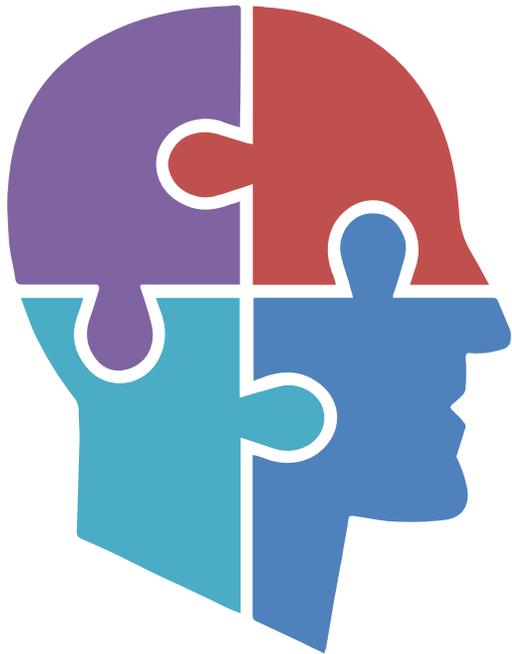

Daily physical activity and emotional well being.

Elimination of refined sugars and reduction of refined carbohydrates

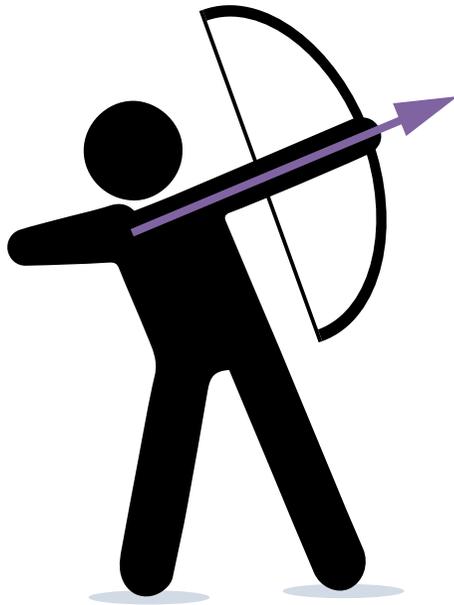

Preventive medicine

- 1 Wellness education
- 2 Tailored medicine
- 3 Biophysics
- 4 Restore the relationship between human being and the health of the planet earth

Our objectives

01

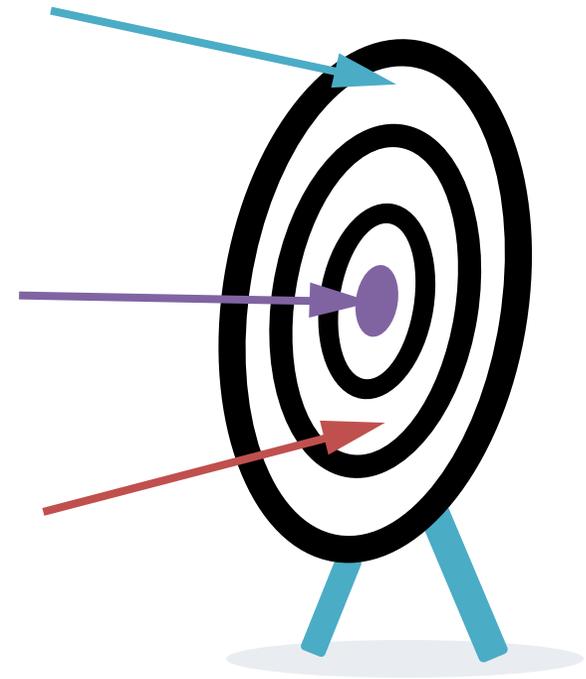

Claiming that covid cures exist and are represented by safe medical treatments

02

Bringing man back to the center, going beyond profit.

03

Through studies and research, propose alternative solutions for the patient's care.

Thank you for your attention

Delegation of IppocrateOrg at the Senate, Rome 13 Sept. 2021
